Draw weight change within a year	<input type="checkbox"/> Unknown	<input type="checkbox"/> Increase	<input type="checkbox"/> Decrease	

What we will do for you @ ASC

Test, cut them if necessary, let them fly on the range, independent of brand or price
Test arrow setups at realistic distances, up to 70 meters
Explain our testing process and how conclusions are reached
Provide a complete arrow specification list (spine, length, vanes, points, nocks, pins, colors)
Advise when arrows should be shortened and why
Explain when changes in draw weight or draw length require new arrows
Give realistic expectations of arrow lifespan, including use on straw targets
Provide clear, transferable advice you can take to any pro shop

Whether you are a beginner, a developing archer, or a competitive shooter, we focus on testing, understanding, and guidance that fits your level and goals.
